The Congregational Conference.

The Oxford Conference of Congregational churches was held at Rev. A. K. Baldwin's church, South Paris, June 11 and 12. The program covered a wide range of topics. The opening sermon by Rev. J. G. Foster of Mexico was an able and interesting discourse. Rev. C. N. Gleason gave a well thought out and arranged paper on the topic, "Is the Spirit of Congregationalism Democratic or Aristocratic?" He showed from the history of the church that in a good sense it was both democratic and aristocratic. Its wonderful missionary spirit and the mighty achievements in the mission fields at home and abroad showed its democratic spirit as well as its policy of form of church government. Aristocratic in its spirit that it had the highest ideals of character and culture. The speaker showed that the highest culture and refinement was not antagonistic to the spirit of Christ who was both democratic and aristocratic.

Dr. C. N. Gleason of Boston, who has a national reputation, spoke of the work the American Missionary Society is doing along the lines of education, industrial training and religious work among the colored people of the South, the Indians and other neglected peoples of our country.

W. H. Eastman of East Sumner, the honored and beloved Scribe of the conference, gave an able address on the place of the prayer meeting in our church life. This paper was followed by discussion.

Mann, State Missionary of the Maine Missionary society. He showed the aggressive, splendid work the society is doing. The address was worthy of publication in full.

Hood of Boston, who represents the Congregational Church Building society, gave a powerful and interesting address on the history and influence of Congregationalism from the time of the Puritans, showing how the Congregationalists largely shaped the form and policy of town, which was well attended as some 60 took supper. There was speaking by the children and singing by Mrs. Fred Sanborn.

The Heart Can't Stand Rheumatic Acid Poisoning

To Free and Correct the Blood a Uric-O Treatment is Advised.

There is great danger in those sharp, shooting pains through the chest around the region of the heart. It means that poisonous uric and rheumatic acid are there ready to spring and grip tightly the muscles controlling the heart's action. Don't neglect these warnings, they are the danger signals Nature flashes to you for help. You must neutralize and drive these dangerous poisons from the system, or sooner or later they will over-throw you.

The only true way to cure Rheumatism is to get at it from the inside with Uric-O. It acts with marvelous swiftness upon the muscles, kidneys and blood. Clears out the sand-like deposits in the muscles, forces the kidneys to perform those duties for which they were designed and neutralizes these within the blood.

Your physician will admit that this is the only true way to cure Rheumatism permanently. And should know that Uric-O is the one remedy that will do it successfully and permanently. Uric-O is a liquid taken internally, 3 times daily and does not contain any morphine, opium or other so-called "pain killers." It is good for Rheumatism in any form. Sciatica, Migraine, Inflammatory and Articular Rheumatism all yield readily to Uric-O. Write the makers of the remedy and they can tell you of many wonderful cures that Uric-O has made right here in your own town.

It is sold for 75c and \$1.00 the bottle or you can obtain a trial bottle free by writing to The Standard Medicine Co., Syracuse, N. Y.

Uric-O is sold and recommended in Norway, by the Noyes Drug Store.

The Odd Fellows are to begin work this week on the lot bought of Jordan Brothers, and they intend to clear it at once and put in the foundations for a new building.

There were only five clear days during May but the rainfall was only 2.14 inches in the whole month. During the first ten days of the present month there was not a clear day, and the rain fell on several days, the total fall being just two inches.

Our road commissioner has crews at work on the highways and reports that it is very difficult to get either men or teams, on account of the great demand for labor on the new buildings that are being erected at the village and at South Harrison.

The buildings at "Camp Wildmere" in South Harrison will probably be completed this week, and the crew that has been at work there will be put to work on the Howard Randall buildings, which are being built on the Joseph Pitt farm. Work is to be completed in season for the hay crop to be housed in it.

The schools in town that are now in session will close a ten weeks' term on Friday, June 28th, and those which were suspended will not be commenced again until the end of the summer vacation. It is designed, however, to have the suspended schools begin earlier than the others, and that all schools in town will have the same number of weeks during the year.

Can making at the corn shop has ceased for the present, at least. 700,000 cans have been made, and the outlook at present is that this number will be fully sufficient for the pack. 800,000 was the number that would have been needed in an average season. Of course the present season may prove to be an average one, but the outlook for it at present is anything but encouraging.

Graduation Exercises.

Norway Opera House was filled to the
limit, Thursday evening, the occasion
being the graduation of the class '07 of
the High School. The stage was hand-
somerly decorated with banks of gilded
plants. Stearns' orchestra of nine pieces
furnished excellent music. On the
stage were seated Percival E. Hathaway,
principal; Myrtle M. Blackwood, assist-
ant; H. P. Boody, sub-master; Superin-
tendent Charles P. Barnes, esq., and
H. L. Horne, W. F. Jones, esq., and
George E. Tabbs, school committee, also
Rev. E. S. Cotton. At 8.15 o'clock the
class marched to their seats led by the
marshal, Earle T. Thibodeau. After an
impressive prayer by Rev. E. S. Cotton,
and more music by the orchestra, the
speaking began.

The salutatory and essay, The Wealth
of Poverty, by Adeline Sara Brett was
well prepared and well rendered. In-
stead of poverty being the accumulation
of destitution and crime, the lack of God
given endowments, the dark robe of
misery and despair, as some say it is, it
was shown how poverty is the parent of
ambition and the source of conflict. His-
tory looks back and on every page the
stamp of poverty has been a source of
inspiration. She told of several of
our brilliant and most honored citizens
who had risen to their prominent posi-
tions from homes of poverty. The
wealth of poverty lies in conflict. From
conflict spring ambition, perseverance,
self reliance. From lack of conflict
comes no song to cheer, no hand to aid,
no heart to love. On the one hand lies
the driftwood of the tide, on the other
the elements that have made the com-
mercial, civil and religious success of
the world's history.

Home Influences by Ruth Georgia
Frost. "There is no place like home."
Miss Frost showed how the influences of
a good home and a kind and loving mother
or had been the means of developing
some of our greatest statesmen, soldiers,
business men and others.

True Genius by Lucy Viola Frost.
Genius is one of the most essential
things. Oftentimes the truest genius is
the least known. There are often those
in small places that by the aid of money
and a little help might become widely
known, that are many times but little
known outside of their own town. The
world goes on ignorant of what it has
lost.

Fannie Stuart Boynton gave the his-
tory of the class in an interesting and
pleasing manner. The freshman class
numbered 35, 26 came from the gram-
mar school, one each from Bridgton,
Oxford and Greenwood, the rest com-
ing from the Norway hills. At the be-
ginning of the senior year there were
fifteen members. Miss Boynton paid a
fitting tribute to Miss Pierce, whose death
came near the close of the winter term.
Abner Hill Mann dealt with Electricity
as a Housemaid. Showing the contrast
between the olden time houses and
those of the present day. Told of the
home of Mr. Tillman in New York, who
has a house without chimney, wood or
coal box, everything being done by elec-
tricity at a slight cost more than by the
old method. He pictured the possibili-
ties of electricity.

The Worth of Character by Goldie
Delle Frost. In all kinds of business it
is not so much the brains as it is the
character that counts. Character is
required as much as capital. Honor,
purity and character count. The essay
was a good one and was well delivered.
The Choice of a College by George
Clark Leavitt. On completing the high
school course an important question for
many to decide is the choice of a college.
Among the important things to be con-
sidered is that he should choose one that
will best fit him for the work he wants
